

PARTNER WITH **A LEADER**

RELATIONSHIPS BUILT ON AVAILABILITY,
RELIABILITY AND TRUST

We are one of the fastest growing logistics companies in North America. Our drivers come to you with 20+ years of experience.

Shipping fresh produce is a time-sensitive matter. That's why we have created an extensive network of carriers who are experienced in shipping fresh produce and temperature-controlled freight.

PERISHABLE TRANSPORT

PARTNER WITH A LEADER

OUR STORY

In 2012 Bedford Plastics partnered with Trellis Growing Systems on an installation berry farm to showcase a rotating trellis system for blackberries. The consortium purchased 20 acres in Bedford County and named it Blackberry Bottom.

Within just a few years Blackberry Bottom Farm was the **largest blackberry grower on the east coast and a leading distributor of berries** to Walmart, Costco, Giant Eagle, and many other retail outlets.

The farm thrived for ten years under the leadership of the Stahl family, owners of Bedford Plastics. **In 2018 Reinforced Logistics was created to meet a demand for a better option for transporting their produce to market.**

PROFESSIONALS YOU CAN TRUST

In the cold chain logistics world, not all cold temperature is created equal. With perishable foods, exact temperatures matter.

Reinforced Logistics is a leader of cold chain transportation, ensuring fresh fruit and vegetable delivery at peak ripeness and in the best condition for retail sales.

We meticulously plan shipping routes and consider weather patterns, FMSA regulations, proper packaging, produce origin and seasonality, truck temperatures, and shelf life.

There has never been a time like this. And there has never been a partner like Reinforced Logistics.

We Are **Relentless.**

We Are **Problem-Solvers.**

We Are **Different.**

We Are **Passionate.**

We Are **Up to the Challenge. And...**

**WE NEVER LOSE OUR
DRIVE TO DELIVER.**
